

Introduction

Few years ago I became interested in the UFO subject and wrote my first (scant) article about it, then expanded my knowledge and wrote another one. Since then I have watched many related documentaries and conducted an on-line research. I even read C. G. Jung`s thoughts on this matter made from strictly psychological perspective. Now I feel ready to appropriately process the respected issue.

I will start, just as dr. Jung proposed, by considering UFO`s to be nothing more than a rumour of the psyche. Meaning that an idea originates in a person`s mind, stimulated with certain unconscious element(s) and manifest outward as a mere projection of the content. Yes, that is true in certain number of cases.

We also have serious mental disorders like delusion, psychosis and schizophrenia which could be the root source of the problem. Especially when people involved, in addition to seeing extra-terrestrials, claim to be abducted as well and, in some cases, medically treated. Healings can be self-induced as a consequence of a belief that event really took place.

Or the alleged sighting can be a product of "bokeh", different misleading

light distortion effects accidentally produced in a photo lenses, consequence of a natural phenomenon, deceptive physical object(s) appearing in the sky or just a planned fraud.

There is many more empirical explanations for the reported sightings like ones that include seeing actual superadvanced military airplanes such as Skunk works: XP80, U2, SR71, F117A, B2, YF22, Dark Star, TR3B Astra and Aurora.

There are also naive statements given by authorities and their tragicomic cover-up attempts, which indirectly confirm an authenticity of an event, fooling only general public while in the minds of UFO researchers wake more suspicion than before official reaction was released. For example, watch how Harold Brown, 14th US secretary of defense, looks down when saying "we don't hide anything" or how Joe Biden scratch his nose when saying "slow moving objects". Obviously, selected officials are not familiar with a body language.

Roswell incident

Most known UFO sighting happened in Roswell, New Mexico, in 1947. I deduct this facts as very intriguing : 1) initial press article published in the

Roswell Daily Record newspaper explicitly mentioned "flying saucer" and "flying disc". Subsequently, army changed its story to "weather balloons"; 2) the photos of major Jesse Marcel holding debris were fabricated; 3) testimony of Bob Lazar; 4) numerous UFO sightings reported before and after the Roswell case starting with 1944. "Foo Fighters" observed by USAF pilots during the WW2.

Area 51

Famous Area 51, also called Groom lake, is a US military site, located in Nevada, USA, near no less famous town Alamo. Supposedly, it is the place where US Army keeps an alien space crafts, reverse engineer and examine extraterrestrials found while unknown materials are sent to other laboratories, on US soil of course, specialized for mass spectrometry and thorough chemical analysis. Results discover element(s) isotopes, manufactured at angstrom level (1/10 nm), having incredible self-restructuring, anti-gravity and aerodynamic properties.

UFO (UAP) background

Efforts invested like several projects, establishment of the Robertson panel, Condon Committee and M12 more served to hide and manipulate the truth,

in order to calm the citizen population, than to deal with the core of the subject which US military and intelligence proceeded to do but in the top secrecy mode, at the highest level of classification, deep inside underground facilities built beneath the western mountains. Even Presidents of USA, Admirals, 5 star Generals (Eisenhower), senators and congress committees were (are) denied access to the restricted files.

Termination (closure) of the Project Blue Book chronologically corresponded to the political elections in 1969. when Richard Nixon succeeded Lyndon B. Johnson in the chair of the President of the USA. New administration don't like tail(s) from their predecessors. Obviously, politics has advantage over the truth.

But sightings occur all over the globe not only in the USA. Former USSR, Mexico, Brazil, Australia, Africa, China, UK, Belgium, ex-Yu, etc. - UFO phenomenon is wide spread, global concern.

Russia has its own Roswell incident. It happened in Dalnegorsk, Primorsky Krai, in 1986., at the so-called Height 611 spot.

There are USO phenomena (Unidentified Submerged Objects) which are less familiar to the public than their aerial equivalents marked as UFO (UAP

from recently), happening in Baltic, Black Sea and elsewhere. It is the same thing but occurring underwater. The sole witnesses are crews of a military submarines with their sonars.

Most disturbing events include UFO sightings over secret army nuclear bases, both of USA and USSR, probably China as well, like Malstrom, Minot and Byelokoroviche when alien visitors tempered with nuclear arsenal almost causing global catastrophe. Weapons were briefly activated before turned off in a likewise manner.

EBE (Extraterrestrial Biological Entity) was caught more than once and held in captivity, some UFO conspiracy theories claim, like the ones surrounding Roswell and Varginha incidents.

AATIP (Advanced Aerospace Threat Identification Program) is a program of studying Unidentified Flying objects (UFOs), or Unexplained Aerial Phenomena (UAP), started in 2007. certainly influenced by 2004. USS Princeton encounter, part of Nimitz group. Although AATIP supposedly ended in 2012., following decade has brought new incidents related to US Navy ships like aircraft carriers Theodore Roosevelt (2014./15.) and Russel (2019.) events were.

Indian culture is full of alien reference such as "star people" and "sky gods", especially those of Hopi, Lakota, Cherokee, Inuit, Zuni, Cree and Shoshon tribes. No wonder since Indians lived under an open skies. There is a book titled "The Sacred Ways of the Lakota" written by Wallace Black Elk in which author recalls personal UFO sighting. Allegedly, he communicated with an extraterrestrials by the means of telepathy. Interesting geological formation called Devils Tower National Monument, located in Wyoming, USA, is in Lakota folklore associated with foreigner living among them. Also in Wyoming, there are petroglyphs, stone engraved carvings, and a few pictographs, at Legend Rock site, belonging to the Shoshon Indians, depicting beings coming from an outer space. Although rock art can be found at various locations, both in USA and worldwide, this specific images are indeed intriguing, unique. Dated around ten thousand (10.000) years ago, illustrations of abstract antropomorphic, supernatural entities can easily be a result of an altered states of consciousness related to the performed rituals, product of an intuition or a prediction, not at all consequence of an actual encounter.

In Tule River Indian Reservation, California, there are petroglyphs and rock paintings made by Yokuts tribe depicting large, hairy creatures named Bigfoot (Sasquatch). Estimated age is from 1 year CE to 1200 years CE.

X Files

X Files is a common term which include all recorded paranormal phenomena such as UFO sightings, alien abductions, supernatural manifestations (apparitions and hauntings), ESP and more. It is a theme of popular sci-fi tv serie, having the same name, but there are also numerous other productions covering the respected subject. It is scientifically discarded since no major University offer such department, division or course.

Less known to general public, Duke University has section dedicated to the research of an unexplained occurrences.

For more informations about paranormal, I point you to my past article named "Parapsychology - myths and phenomenons".

ESP

Extra Sensory Perception, colloquially known as "the sixth sense", is a mental ability which uses different than normal mean(s) of communication, an alternative functioning, enabling adept, or just susceptible, individuals, mediums and mystics of sort, to gain insight into the reality unavailable to an ordinary people and unattainable with an application of the regular scientific methods at our disposal.

It can be regarded as a deeper-than-usual awareness of the environment.

ESP divergence: precognition, retrocognition, clairvoyance, telepathy and telekinesis (psychokinesis). All connected phenomena belong to one of this 5 elementary categories.

Extra sensory perception is, without any doubt, thoroughly examined by military and intelligence agencies worldwide. They would weaponize a daisy if they could. Experiments like MK Ultra and Montauk cast dark shadows exactly in that direction.

In my opinion, quantum field theory is the most probable explanation.

Strange things I have personally experienced are "deja vu" (when my on-line money account currency setting changed from Euro to Swiss Franc, without my interference, after I physically exchanged cash banknotes at the local office counter in my neighborhood), synchronicity (when I look at an unknown people sometimes they instantly look back right at me) and I tried divination using I Ching.
